Subject: RE: Atchison, MGP and RCRA

R7 RCRA has no ongoing activities planned for either of the two MGP Ingredients facilities in Atchison at this time.

The 1300 Main Street facility is a Small Quantity Generator that generates D001 (ignitable), D002 (corrosive), D003 (reactive), and D035 (MEK) wastes. It was inspected 8/1/12 by KDHE finding 5 typical violations unrelated to the process tanks in question. Three previous inspections found no violations.

The 200 Commercial Street facility is a Conditionally Exempt Small Quantity Generator that has never been inspected.

Subject: FW: Atchison - need statement

What will Region 7 be doing in the aftermath of the release at MGP Ingredients? I think any statement will be more generic as far as our work to look at the release but need to know if we will have activities ongoing from RCRA and Air. Hoping to develop statement this morning. Thanks in advance.

Subject: FW: Atchison - need statement

David,

You will need to track down Dave Hensley in my office. I am in DC in the middle of an all-day meeting. Wilfredo or Pat Reitz may also be able to help you.

1. CORP will be sending a chemical release questionnaire to see if the followed reporting rules.

2. 

3. Past inspections by EPA or State were in the RCRA and Air programs. Mary Goetz or Mark Smith will have to get you any information that you want on that.

Subject: Atchison - need statement

Have half a dozen media inquiries regarding MPG Ingredients and any EPA investigation. Need to put together a statement for them along the lines of "we don't talk about ongoing investigations." Do we need to say anything about what our jurisdiction would be? Keeping this to a short list at the moment to get the ball rolling on a statement. Would like to answer media this morning.
